

GLOBAL HOPE FOUNDATION FACT SHEET

- ◆ The **Global Hope Foundation** is a 501(c)(3) nonprofit secular organization established in March 1999 for the purpose of lessening the disparity in the access to medical treatment between Western industrialized and developing nations.
- ◆ The primary mission of the **Global Hope Foundation** is the development and implementation of comprehensive community-based HIV/AIDS prevention and treatment programs in the hardest hit developing nations with the collaboration of local and national health authorities, community groups and other non-governmental organizations.
- ◆ Focus is placed on alleviating the suffering of those having: (1) the greatest needs, and (2) the least hope of access to standard treatment. The **Global Hope Foundation** does not recognize race, religion national origin, political affiliation, ethnicity, sex or sexual orientation as criteria for receiving aid.
- ◆ Working directly with the medical caregivers, the initial focus of the **Global Hope Foundation** has been assisting children and women with HIV/AIDS at medical facilities in Rwanda. Special efforts are made to facilitate access to medicine for the prevention of mother-to-child transmission of the HIV virus and the establishment of medical training programs for the treatment of HIV/AIDS. Assistance will ultimately expand to encompass other parts of sub-Saharan Africa, the emerging economies of Eastern Europe, India and Latin America.
- ◆ The **Global Hope Foundation's** vision recognizes the world as an international community which must cooperate together in order to succeed at alleviating global suffering. Accordingly, the Board of Advisors of the **Global Hope Foundation** represents a cross-section of nationalities and specialties:
 - **Dr. Ian Campbell**- International Health Program Consultant, Salvation Army, *Melbourne, Australia & London, U.K.*
